IMSDA EVENTS / GETTING STARTED

IMSDA Events: quick start for club leaders

> A practical guide for club directors and Area Coordinators · October 2026
> Start at events.imsda.org. Use the tools assigned to your account.

For club directors, deputies and Area Coordinators · October 2026

Start at events.imsda.org. IMSDA Events keeps club records and event participation together. Directors maintain their club's information; coordinators review progress and follow up with directors. The roster records club membership. An event registration records who is going to one event.

Sign in and open your work

1. On the website, choose **Sign in**. Use your own existing account email and password, or a configured passkey when offered.
2. Complete **Confirm it's you** if requested. Use your authenticator, an unused recovery code or the passkey option offered.
3. **Director/deputy:** open **My club** or **My clubs**, then the correct club. **Area Coordinator:** use **Clubs overview** on the **Area coordinator** card, or **Clubs** in account navigation.
4. Check the club/year or year heading before working. Your actual assignment determines which tools appear.

First time with a club invitation?

Use the email address that received the invitation. Already have an account? Sign in to it. New here? Choose **Create an account**, enter your details and **Create account**. Keep the same browser open; enter the emailed six-digit code and choose **Verify and continue**. Then choose **Accept** beside the correct club invitation on your account page.

If prompted, complete **Set up two-step sign-in**. With an authenticator, choose **Set up an authenticator**, follow the displayed setup instructions, enter **Code from your authenticator** and **Confirm and turn on**. Save the recovery codes and choose **I've saved these codes**, then **Continue**. A passkey is another supported method when offered; both methods are not required.

The email verification code and authenticator code do different jobs. The first confirms your email address; the second protects access to club information. An Area Coordinator assignment comes from the conference office rather than a public role selector.

Club director or deputy: practical tasks

I need to...	Go here and do this
See what needs attention	**My club → Home.** Check the club name/year, next task and summaries.

I need to...	Go here and do this
Add a regular member	**Roster → Add to roster.** Check for an existing row first, enter the requested details and confirm the saved row. This does not register the person for an event.
Correct or pause a member	Use the person's **Edit** control and **Save**. **Deactivate** keeps the person on file; **Reactivate** returns them to the active list. Read **Remove** carefully: it erases roster details and cannot be undone.
Complete a club form	**Forms → available form.** Fill in for a member or use the private-link option. Return to **Filled forms**; use **Open** for a draft or **View and print** for a submitted record.
Record a meeting	**Monthly Records → month → Add meeting note.** Enter the date, counts and details; save. Optional named attendance depends on roster access.
Submit the month's report	Open the month and **Open Monthly Record** or **Continue report**. Check the details and displayed due date. **Save draft** is not submission; use **Submit report** when ready and check the submitted result. The current due date is the 10th of the next month.
Register for an event	**Club events → Register / Continue.** Follow **Who's going → Each person's details → Review**. Submit and check the confirmation/status. A saved draft or waitlist is not a confirmed place.
Check an existing registration	**Club events → View.** Make permitted edits with **Save changes** while available. Use **Print club packet** or **Download registration PDF** where offered. For a church-billed event, follow the sponsoring church's office billing process.
Review achievements or supplies	**Honors**, **Class tracking** and **Orders** cover their supported records, helper lists, stock and hand-outs. Orders is not an online store checkout. Use the available approved reports/exports when needed.

A deputy has the director's capabilities. A registrar and reporter have narrower roles, so their available tools differ. A missing task may need an assignment check rather than a second account.

Area Coordinator: review and follow up

I need to...	Go here and do this
Find a club	**Clubs → All clubs.** Search by club, church or city; choose **Open**. Other clubs normally open **View only**.
Choose a follow-up task	**Overview.** Check the year shown, reports, points and summary counts. Open the club to understand the item. Reading a summary does not complete its task.
Read a monthly report	**Monthly Records.** Find the club/month. Select a submitted month's points to open its report. **Draft** is started but not submitted; **Missing** means the due date passed without a submitted record.
Understand points	**Points.** Review the chart/table and separate components; sort by points or club name. **Download points CSV** covers the full year's authorized club list, not just the visible name search.
Check event participation	**Club events.** Read each club's state and headcount. Registered, Draft, Waitlisted and Cancelled mean different things. Follow up with the director about the actual unfinished item.
Review an assigned team request	**Team approvals.** Read the event's rules and use **Approve** or **Decline** only for the requests your own coordinator account may decide.

I need to…	Go here and do this
Review a new-club application	**New clubs.** Coordinators may read the information; a system administrator makes the approval/decline decision.

The current coordinator list shows available active clubs; an enforced “my area” selector is not part of this guide. Most coordinator work is oversight, with the specific Team approvals exception. Directors make ordinary corrections to their own club's records.

If you need help

- **Forgot password?** Choose **Forgot password? → Send me a code**. In the same browser, enter the emailed code and new password, then **Set new password**.
- **Club or coordinator tools missing?** Check the signed-in email. Ask the conference office to verify the invitation/assignment; avoid making a duplicate account or new club application.
- **Lost authenticator?** Use a saved recovery code or available passkey. Ask the office for account support if neither is available.
- **Page or save problem?** Tell support the club/year or event, page, intended action and visible error. Keep passwords, codes, private links and member health details out of messages/screenshots.

Before leaving, confirm the result of your task and choose **Sign out**, especially on a shared device. Next time, return to the same website and use your existing account.
